CAREER OBJECTIVE

- As an experienced Front End web developer and team lead with more than 3 years of industry experience, I am seeking a challenging role where I can leverage my problem-solving skills and leadership abilities to contribute to the growth of a dynamic organization. My passion for creating user-friendly web experiences, coupled with my ability to lead and mentor a team of developers, make me an ideal candidate for any project. With a focus on delivering high-quality work and exceeding expectations, I am confident in my ability to make a valuable contribution to your team.

WORK EXPERIENCE

Software Engineer
Tata AIG

📅 August 2023 – Ongoing　　📍 Gurugram, India

- Develop and implement client-requested changes (CRs) related to insurance functionalities, ensuring alignment with project objectives and timelines.
- Troubleshoot and resolve front-end and occasional back-end production bugs promptly to maintain system stability and user experience.
- Enhance team productivity by devising and implementing improved workflows, optimizing processes for better collaboration and efficiency.
- Note: Initially employed under EY payroll while working for Tata AIG until November 2024, then transitioned to Tata AIG payroll.

Front End Developer
Vidya Mantra EduSystems Pvt. Ltd.

📅 December 2021 – July 2023　　📍 Noida Uttar Pradesh, India

- Developed and maintained multiple websites using NuxtJS and Vue.js frameworks.
- Optimized our notification website by reducing load times by 70%, resulting in improved user experience and increased customer engagement
- Managed a team of developers as a team lead, delegating tasks and overseeing the development process to ensure high-quality output.
- Conducted code reviews and implemented best practices to ensure code quality and maintainability.
- Proactively researched and recommended new technologies and tools to improve development processes and workflows.

Computer Science, Subject Matter Expert
Chegg Inc.

📅 October 2019 – November 2021　　📍 Delhi, India

- Solving student queries.
- Writing solutions to problems.
- Debugging programs submitted by students.

PROJECTS

Secret Messenger
📅 October 2022

- The app allows people to confess their feelings without being judged.
- The app enables anonymous messaging within a group, whether privately or publicly.
- Frameworks used - NuxtJS, TailwindCSS.

ATM Software using C++
📅 February 2018

- The ATM prototype included key banking features such as user authentication, cash withdrawal and deposit, and bank account management.
- This project helped me gain practical experience in software development and demonstrated my ability to create functional and user-friendly software solutions.
